Brand/product	Honeycomb Core Doors
Date	April 26, 2019
Subject	Honeycomb Core Free of Phenol Formaldehyde
Contact	Ken Richied

Dear Valued Steelcraft Partners,

We are proud to announce that as of April 15, 2019, all honeycomb core doors produced at Steelcraft are free of Phenol Formaldehyde. This honeycomb core is made available while maintaining or improving core strength based on ANSI A250.4 and SDI 131-15 (previously ANSI A250.5).

This improvement is an important step in providing building products that better support our health and the environment, as well as providing the specified products you need.

In the next couple of months we will have documentation that includes our updated core in support of CALGreen Certification and CDPH Standard Test Method v1.2 01350 (2017) as well LEED EQ Credit for Low Emitting Materials. Current EPD and HPD documents related to sustainability and specifications for LEED, Well Building Standard, and others can currently be found on our site:

<https://us.allegion.com/en/home/trade/architect/resources/sustainable-building.html>.

We will also post under Steelcraft at a later date for your convenience:

<https://us.allegion.com/en/home/products/brands/steelcraft.html>.

Please note that stock and configured doors produced prior to April 15 but not yet shipped will contain the old honeycomb core.

If you have questions, please contact Steelcraft Product Support at doors_frames_techprodsupport@allegion.com or (877) 671-7011 #2, #5. For marketing support, please contact Steelcraft marketing manager Jeff.Alwine at Jeff.Alwine@allegion.com.

Regards,

Ken Richied, Product Manager, Steelcraft Manufacturing
